‘Wishing Well’  
Parker Gallery, Los Angeles  
Through August 5, 2023

‘Wishing Well’ is the result of a communal effort among 78 artists for a worthy cause: gene therapy research for SELENON-related myopathy, a debilitating, genetic neuromuscular disease. Each artist in the multigenerational, interdisciplinary group – ranging from painter Nicolas Party to pioneering choreographer and filmmaker Charles Atlas to sculptor Kelly Akashi – donated a work, and 100 percent of proceeds will go to Giving Strength, a non-profit research fund that artist Madeline Hollander and gallerist Sam Parker co-founded soon after their infant son was diagnosed with the disease.
